Editors: Inés Sánchez de Madariaga and Marion Roberts.

ISBN: 978-1-4094-1024-9

Bringing together a diverse team of leading scholars and professionals, this book offers a variety of insights into ongoing gender mainstreaming policies in Europe with a focus on urban/spatial planning. Although gender mainstreaming was first legislated in late 1990s and some interesting developments have occurred, there is still much to do in terms of policy, knowledge production, dissemination and education. This work contributes to all three objectives, by advancing the state of knowledge, as well as providing educational and professional tools in the field of gender sensitive planning in Europe. The book is structured in four sections: concepts, structures, empowerment and spatial quality. The book concludes by putting forward an outlook for future action. (*English edition*)

Escrito por un grupo diverso de académicas y profesionales líderes en materia de género y ciudad, Fair Shared Cities ofrece una perspectiva amplia sobre las políticas actuales de transversalización de género en Europa, particularmente en el campo de la planificación espacial y urbana. Pese a que el mainstreaming de género se legisló por primera vez a finales de los 90 y se han producido algunos avances interesantes en su implementación, queda todavía un largo camino por recorrer en el desarrollo de políticas, la generación de conocimiento, y su transferencia al público en general y al especializado. Esta publicación supone un paso adelante en todas estas cuestiones, aportando novedades en el marco teórico, pero también ofreciendo herramientas de aplicación en la esfera profesional y formativa que puedan servir de guía en todo el contexto europeo para un urbanismo con mayor sensibilidad al género. La estructura del libro consta de cuatro secciones: conceptos, estructuras, empoderamiento y calidad espacial; y concluye con un último apartado con propuestas para el futuro. (Edición española)
